Topmark

PREFORMED THERMOPLASTICS CATALOGUE

Preformed thermoplastics for lines and signs.

Preformed thermoplastics are durable, high quality plastic markers that can be easily applied on almost any surface. Product and business process innovation is extremely important to be able to continue to fulfil our role in road safety. Therefore we present you this guide. Through the unique collaboration of the ACB group with the WJ group, two established values in road safety, we offer **TopMark** (safety markings) and **PlayMark** (play formation markings).

“ Education, safety and protection in one fluent movement.

Why ACB Group?

Flexibility

We are a unique player on the market due to the fact that we are constantly searching for new developments and improvements, have insight into the sector and meet the customer's individual needs. Quick and accurate deliveries, custom packaging, easy ordering methods and a proper pricing policy makes us the ideal partner.

Environment

We are motivated to work with you towards a caring society. Our experienced employees in manufacturing, sales and development strive for us to be an honest and reliable supplier of road markings. This is even reflected in the selection of our raw material suppliers. We strive to participate in social activities which broaden our mission and portray the correct character.

Innovation

Our R&D-department approximates the current technology, price, quality and environment with the best possible options to achieve the intended result. We also try to assist our clients with innovative products and work with them to develop something special. Our quality control departments ensures that we deliver quality and excellence at all times.

Safety

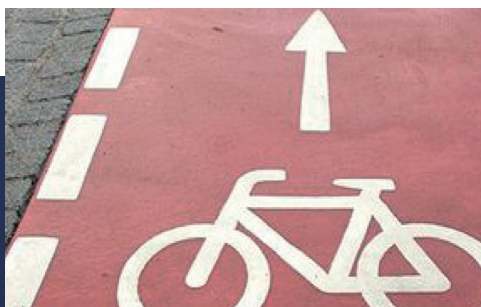

The government is committed to provide vulnerable road users with increased safety. We are working with numerous companies, contractors, schools and other institutions to ensure that our markings are made with care and quality.

This way we want to make a difference for the environment and for safety. It has been proven in multiple studies that horizontal markings make traffic simpler and safer than vertical markings. We like to contribute our part in this.

The advantages of our brands.

Both TopMark as PlayMark allow you to go in any direction wanted. The sky is the limit. Do you have a message that everyone needs to know? A logo, advertising, number plates or customization? Let it come true in one of our products.

- ✓ Wear resistant and environmentally friendly
- ✓ Colourful and simple and fast application
- ✓ Resistant to all weather conditions
- ✓ Infinite number of applications
- ✓ Customization possible in production from 1 piece

TOPMARK

has a great added value for road safety. It entails horizontal markings that you encounter in the form of safety signs, shark teeth, speed limits, traffic signs with arrows or traffic signs with the desired texture and reflection. TopMark does everything to ensure safety on the road.

PLAYMARK

beautifies the area, but also has an educational, sporty and playful character. Are you looking for great games or would you simply like to learn something while playing a game? Allow yourself to be surprised by the PlayMark range.

Application

Our products are suitable for all road surfaces, parking lots and other road surfaces. We use our primer an adhesion primer with excellent adhesion to concrete, bricks, tiles and paving.

At the start of the work the surfaces must be completely clean. Brush the surface and burn all the moisture away. If a primer is required, apply a thin layer of our primer using a roller.

Firstly tape the figure or zone before applying a primer, for a contoured result.

Order and supply

Orders can always be made via telephone or by mail. From the moment that your order has been confirmed we will do what is needed to deliver this asap.

Use

Follow the clear illustrations, they simplify the work. You may also request assistance from our support team. Do you need any information? Don't hesitate to contact us.

Aftersales

We believe that after sales service is just as important as sales and delivery. Would you like to learn more about delivery or shipment? Our support team is at your service.

Topmark for safety

TopMark represents horizontal markings in accordance with European standards which you find among others on the road in the form of traffic signs and safety markings. They are usually used in a professional infrastructure for pedestrian paths and bicycle paths, parking lots, roads and runways.

Certifications

Our product Topmark proved his strength and quality throughout the years by participating and succeeding numerous official road trials and simulation tests. For example in Belgium we received since many years the Benor P6 certificate. This means the product was road trialed and monitored for over 2 years and 2 million roll overs. Over this period Topmark was still performing well above the general specifications. Also in other countries we managed to get the respective certificates: NF, BAST,...

Professional

The expertise and accurate finishing of road signs are generally well prepared and ready for immediate use. The convenient packaging indicates the order and method in which you can easily and professionally apply the product.

Environment

Our quality is a constant, both professionally and socially. We do not just mark the area, we do this considering the environment. This is a top priority or ours, zero waste during production is proof of this. Our R&D department is always searching for trends in user and environmentally friendly solutions.

Safety

The number of road signs in our possession is quite extensive. You should take your time to read the manual.

**Wondering how we can
work together for safety
of the vulnerable road user
to improve?**

Playmark: game and training markings

PlayMark consists of fun and child friendly horizontal figures and games with creative and educational applications such as playgrounds, play streets, youth rooms, playgrounds, communes and daycare.

Playful

Our wide range of drawings is prepared playfully and educationally. Contemporary games offer an added value for kids. Especially on a social level. The playful character stimulates the interactivity between the children at school or on the street. These products are also simple to use and apply.

Education & colorfulness

Children can always play, without loss of quality or loss of color. The shapes are well-known games that promote learning, team work and education. The alphabet, figures or traffic rules are only some of the options where learners can play in team context. Thus increasing their mobility and coordination skills.

In addition to the examples in this catalog, custom designs can also be realized.

Do you wish to receive more information regarding the possibilities of PlayMark?
